

① Quick Coomassie Stain

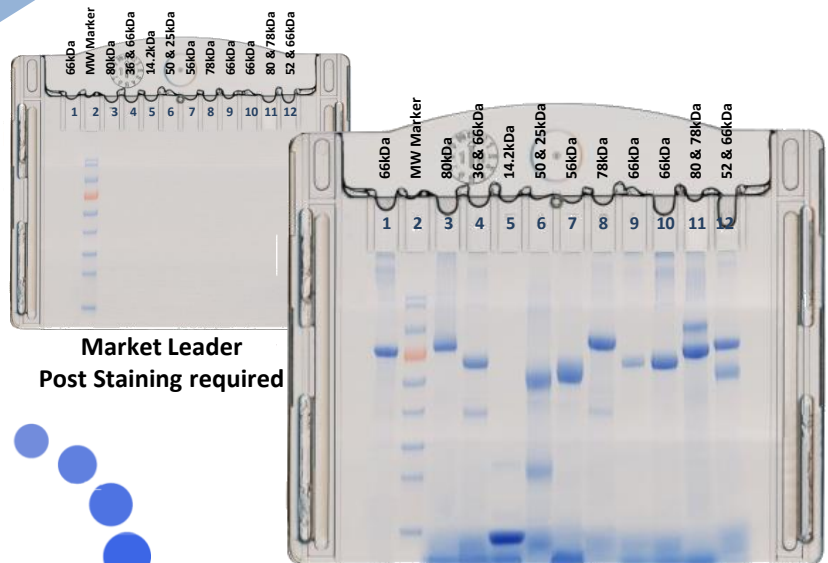

Optimized Post-Stain for complex mixtures, lysates, serum, pure and partially pure proteins

Speed up your SDS PAGE protein staining with:

- FAST • SENSITIVE • SAFE
- 50 times more sensitivity than other stains
- Protein bands down to 5ng
- Rapid 1-step procedure
- Ultra low background

②

**The Only Universal Protein
Pre-stain on the Market**

**Visualise your proteins as
they run on your SDS PAGE gel**

**Realtime
stain**

Patent Pending

**Optimized for pure and
partially pure proteins**

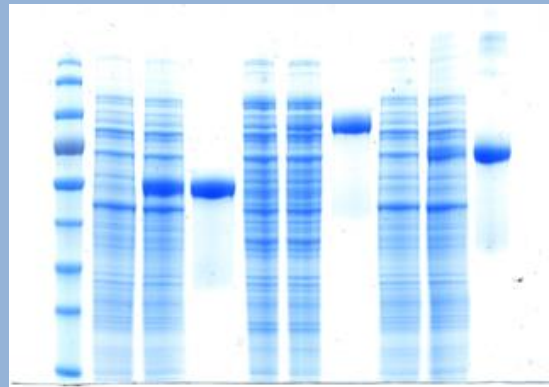

Order codes:	Description:	No of gels (10 lanes)
GEN-QC-Stain-1L	Quick Coomassie Stain (1L)	40
GEN-QC-Stain-3L	Quick Coomassie Stain (3L)	120

HIGH RESOLUTION

Sharp protein bands that you would expect with traditional Coomassie staining

SENSITIVE

50 x more sensitive than other rapid stains

RAPID

15 min 1-step stain

Samples prepared using Tris-Tricine sample loading buffer and run on a 12% NuSep Tris-Glycine SDS PAGE gel. Stained using Quick Coomassie stain.

LINEAR RANGE

Very low background to accurately quantify proteins

DURABLE

Re-usable up to 3 times!
Also MS compatible

Produced in association with
Generon Limited

Generon

Dual Trial Pack

Realtime

View protein band separation in **Realtime** during electrophoresis

Quick Coomassie Stain (30ml)
Realtime Stain (0.2ml)

Instant

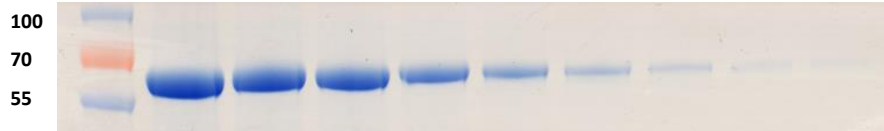

NO Coomassie post staining required

Customised

Make in-house protein ladders with your own well-characterised proteins
